Art Unit: 2823

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1 and 2 are rejected under 35 U.S.C. 102(e) as being anticipated by Lee et al (US 2002/0074548 A1).

Lee et al discloses providing a substrate 40 having an organic light emitting diode unit thereon (Figure 4a, and Paragraphs 0001, 0002, and 0025), forming a passivation layer 42 on the substrate to cover the organic light emitting diode unit (Figure 4B, and Paragraph 0026), wherein the passivation layer is formed of either silicon nitride or silicon oxide (Paragraph 0026), and providing an ion beam such as ion implantation, to perform surface treatment on the passivation layer (Figure 4C, and Paragraph 0027).

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 8 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Sasaki (U.S. Patent 4,404,733).

Sasaki discloses forming a silicon oxide passivation layer 13 to cover an electronic device formed on substrate 11 (Figure 2a, and Column 3, lines 10-19), providing an ion beam such as ion implantation to perform surface treatment on the passivation layer (Figure 2b, and Column 3, lines 20-27), and forming a plastic layer 25 on the passivation layer (Figure 2h, Column 1, lines 17-23, and Column 4, lines 45-55).

Art Unit: 2823

Claims 5-7, 13, and 14, are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Joannie García whose telephone number is (571) 272-1861. The examiner can normally be reached on Monday through Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Matthew Smith, can be reached on (571) 272-1907. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
